Table 1: Airfoil physical field error. Sampling SD uses three seeds. Full has no sampling SD. Airfoil uses the fixed published 110 cases with true $C_L > 0.02$. The official conv-temp is a Full-only supplement and is excluded from rAUEC.

Method	Budget	Error	SD
LinearNO (conv-temp, Full)			
1,765,889 parameters; 1000 epochs			
113,000 updates			
Same-checkpoint Full error: 0.002792			
Full	100%	0.002792	N/A
LinearNO (point-temp)			
585,217 parameters; 1000 epochs			
113,000 updates			
Same-checkpoint Full error: 0.004775
